Back to the case

# From working version to publication

**Protected work** Integration and technical tests

→

**Fixed test bench** Readable deductions and confidential opinion

Return: expert opinions → justified processing → if necessary re-examination.

↓

**Scientific approval** Defined technical decision

**Publisher data package** Set → Return corrections controlled to source data

**Public approval still open** Unexplained

A approval requires the required technical and legal examinations.

version of the selected package release: Still unexplained. Industries are no confidentiality limit. Technical tests do not replace scientific judgement.
