Our Ways of Decision

▼ Read graphic as text

Decision-making methods of the Academy Edition

1. Academy Edition: Connecting Decisions
2. Current selection marked dark
3. Autonomous editorial services

4. Federated working groups
5. Central Editors
6. Who decides together?
7. Lead University
8. Joint Academy Director
9. External Service
10. Who's in charge of the operation?
11. A total repo
12. Sectors + Standards
13. Volume/package repos
14. How are working repositorys tailored?
15. Git-centered
16. Hybrid: responsibility per type of data
17. Database Centered
18. Where is the relevant data maintenance located?
19. Verified data packages → joint integration
20. Fixed test bench, test report, post-processing
21. Scientific and appropriate legal approvals
22. Publishing package → Book
23. Public data → Web
24. Results + protected process
25. Return journeys: Reports and typesetting corrections back to the relevant data.
26. Host/model change: re-examine export, responsibilities and reconstruction.
27. Together: manual, scientific mandates and regulated approaches.

▼ Decision paths and data flows as text

The joint integration combines edition data, rule version and index snapshot in the band manifest. Expert reports and publishers receive each designated excerpts; technical corrections return in a controlled manner. Public data are released separately. A model or host change leads to re-examination and replaces no care allowance.
