One cause, several consequences: End of university connection

1. End of
2. University connection
3. may affect several services
4. Repo access
5. at risk?
6. Possible consequence · to clarify separately
7. Moving working repository
8. according to the instructions
9. If necessary
10. oXygen authorisation
11. clarify the eligibility; or

12. Choose the appropriate tool
13. Advice
14. more available?
15. Maintain instructions; if necessary
16. Arrange replacement advice
17. Institutional publication
18. services still available?
19. Publication Host and
20. Check the output path
21. Making further work possible
22. A common cause does not mean that all consequences occur.
23. Individually clarify accesses. Plan, examine and document measures; their effect has not yet been established.
24. Edition compass · Anna · neutral overview · 20 October 2026

If the university connection ends, we examine repo access, tool license, consulting and publication services individually. A repo move receives files and Git history, but does not replace either advice or a tool license. The measures will run together during the planned further work.
