20. Completed
21. Together: Get understandable data and make commitment visible
22. All ways: tested releases, understandable documentation and tested handover.
23. Change requires re-examination; different ways mean different work.

▼ Decision paths and data flows as text

Sources and internal research lead through an early publication concept for examination and curation. The public repo provides released data, rules and examples. Releases are archived independently. Researchers work locally with designated versions and report back corrections or new annotations; their adoption requires testing and maintenance capacity again.
